

The **Connected Future** starts at **Cabelte**

Cabelte

About Us

Energy that Connects the Future

We are a **leading company** in the **production of electrical cables for low, medium, high voltage up to 275kV.**

In every meter produced, we demonstrate our ability to deliver innovative and efficient solutions.

At Cabelte, **every project is an opportunity to drive the growth of our partners**, whether in large energy and industrial projects, as well as in the construction, infrastructure, or renewable energy sectors.

Preparing our Tomorrow

Cabelte's true mission is to prepare our tomorrow, connecting today's generations to those who will build the future. **Every cable produced and every service provided is a step towards a more connected, innovative, and efficient world.**

We are **committed to turning challenges into opportunities**, confident that our positive impact extends to society as a whole.

We believe that **we can create a future sustained by the energy that drives transformation.**

“ *Innovation is our essence, quality is our promise, and trust is the foundation we build with our partners. But the most important pillar is the people.*

Our Clients Our Energy

Great projects start with strong partnerships. Over the years, we have built trust with national and international companies, delivering customized solutions for diverse industries.

We collaborate with leading utilities, power distribution companies and contractors, ensuring the safe and efficient transport of energy across vast networks.

Our high-performance cables are designed for:

- **Transmission and distribution networks** – Reliable solutions for low, medium, high voltage and extra high voltage applications.
- **Grid modernization** – Supporting smart grids and renewable energy integration.

Substations and interconnections – Ensuring stability and efficiency in energy supply.

Innovation, reliability, and excellence - these are the values that guide our partnerships. Together, we power industries and shape the future

Trusted Solutions for Distributors and Contractors

We work closely with **distributors and contractors**, ensuring the **availability of top-quality cables for diverse industries**.

- **Distributors** – We provide a wide range of cables ready for immediate delivery, meeting the demands of infrastructure, construction, and industrial projects.
- **Contractors** – Our solutions support major engineering, procurement, and construction (EPC) projects, offering reliability and long-term performance.

What we do

At Cabelte, **we don't just manufacture cables; we deliver complete solutions for every need.** Every day, **we invest in innovation** to develop **more efficient, durable, and sustainable products.**

High and extra high voltage cables

- Single core cables
- Voltage up to 275 kV with cross-section up to 2 500 mm² in copper or aluminium
- Stranded round and milliken conductor
- Metallic screen with wires, tapes or welded tube
- Medium Density Polyethylene (MDPE), High Density Polyethylene (HDPE), Low Smoke Zero Halogen (LSZH) Oversheath

Medium voltage Cables

- Single and three core cables
- Voltage up to 36kV with copper or aluminium conductor
- Metallic Screen in copper or aluminium tapes or wires

Domestic and industrial Cables

- Harmonized cables
- Control and instrumentation cables
- Cables for special applications (fire resistance, chemical and mechanical protection)

Overhead line Cables

- Low voltage overhead power distribution cables
- Cross-sections up to 150 mm²

Bare conductors (OPGW, ACSR, AAAC)

- Bare conductors up to 1144 mm² for MV/EHV overhead lines up to 400 kV
- Optical ground wires built-in fiber optics with stainless steel or aluminium tubes

More than Energy: Commitment to the Future

Services

Customized Development

We create **solutions tailored to our clients'** specifications, from design to production, ensuring the best performance for each application.

Technical Consultancy

Our **teams are equipped** to assist with sizing, specification, and selection of the most **suitable cables for each project**, ensuring efficiency and compliance with international standards.

Logistics and Transport

We have an **agile and flexible logistics network, enabling fast deliveries for the success of projects**, including export capabilities to various international markets.

Laboratory

Our laboratory (Lab.) is one of the **most advanced in the Iberian Peninsula**, with the capacity to perform **tests up to 400kV**.

Cabelte products undergo rigorous quality and safety tests before reaching the customer, meeting the highest global standards.

Technological Lab for **Materials, Research and Development**

Fire Testing Lab

Low Voltage Lab

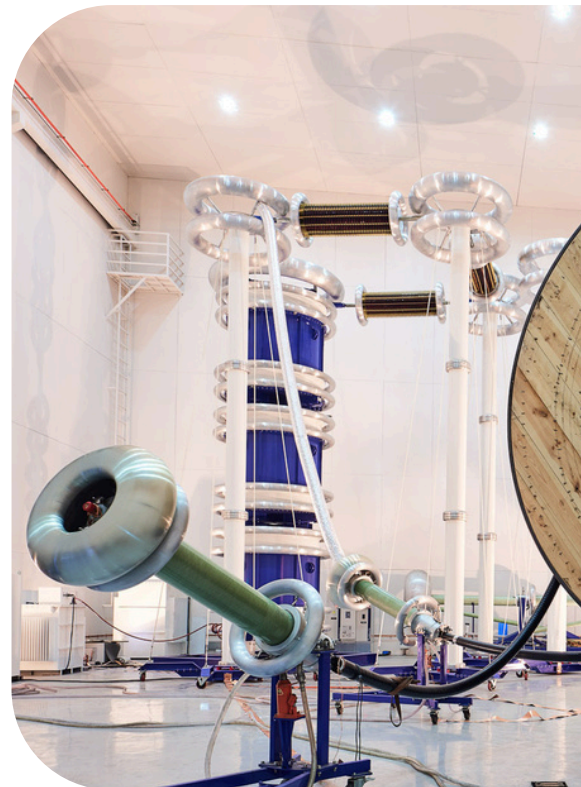

Medium, High, and Extra High Voltage Cable Lab (Faraday Cages for MV, HV, EHV)

Long-Duration Testing Lab

Final Tests Performed for **All Product Ranges**

Sustainability

Our commitment to Tomorrow starts today, and at Cabelte, we invest every day to fulfill this commitment.

- **Photovoltaic Panels**
 - Arcozelo (Installed power - 1.2 MW)
 - Ribeirão (Installed power - 1 MW)
- **Company Fleet** and **Electric Vehicle** Chargers
- **Replacement of Pumping System** in Water Plants
- **Motor Replacement** to Improve Efficiency
- **Energy Management System**
- Cabelte **Recycling Center**
- **Aluminum Recycling** in our foundry

Certifications

We are **committed to excellence** and **comply with the highest international certification standards**:

ISO 9001 - Quality

EN ISO 14067 - Carbon Footprint

EN ISO 14001 - Environment

EN ISO 45001 - Occupational Health and Safety

EN ISO 50001 - Energy Management

Ensures that **we operate with social responsibility**, promote fair labor practices, and **comply with high environmental and ethical standards**.

These certifications reflect our commitment to quality, innovation, and sustainability, ensuring that our products and services exceed global market expectations.

Choosing Cabelte means choosing certified quality and a commitment to the **future!**
